BACHELOR OF ARTS

NQF 7 | MIN. 370 CREDITS | SAQA ID: 120220 | MIN. 3 YEARS

MODE OF DELIVERY: DISTANCE LEARNING

DESCRIPTION

The Bachelor of Arts is a remarkable programme with a dual role (i) in developing graduates with a holistic understanding of the liberal arts and the values of democratic citizenship; and (ii) gearing students with a deliberate and directed career pathway in politics and government, research, and media. With two majors in (a) government and politics, and (b) philosophy, students will acquire penetrating discipline-specific knowledge and learning, as well as hone critical twenty-first century skills. In addition to the tenets of government and politics, and philosophy, the programme curriculum is planned to advance ethical and responsible leaders within the South African, African Continental, and international contexts, equipping students for the public and private sector and to be constructive local and global citizens. Students are trained for employment opportunities in the civil service including diplomatic services, parliamentary support services, and foreign affairs, as well as possible careers in academia, media and journalism, and market research. Students will gain insights into the diverse role of the humanities in society and skills for more respectful intercultural and governmental encounters, with an emphasis on learning analytical skills to understand the African context and to interpret the context creatively. They gain ethical leadership skills that equip them to lead and mobilize for societal transformation. Through innovative learning approaches, the programme promotes an inclusive and transformative ethos of reconciliation, equality, justice, and peace.

The programme equips students to be reflexive practitioners who work within a local, African, and international context.

Successful completion of the degree will lead to an informed historical consciousness, a solid knowledge of politics and the political economy, philosophy, and a critical awareness of the factors that shape the life of society. They learn how to locate and critically interpret different sources and to use them in combatting abuse and injustice, to build safe and just societies. The programme assists students become self-motivated individuals in the world of work (including self-employment).

In summary, students completing the qualification will be well positioned for various careers in diplomacy, political analysis, civil service (foreign affairs), international and local consultant research, market research, academia, and media/journalism.

OUTCOMES

Upon completion of the programme, students will be able to:

- Solve problems and make decisions using critical and creative thinking embedded in a humanistic paradigm.
- Work effectively with others as members of a team, group, organisation in communities and society at large.
- Manage the conceptualisation and implementation of strategies, policies and plans in a public sector environment with due regard to national and global contexts.
- Promote ethical decisions on complex institutional issues with sensitivity and awareness of consequences in an autonomous manner.
- Manage themselves and their activities responsibly and effectively in order to promote and strengthen tolerance and affirmation in problem solving.
- Collect, interpret and process data and information in order to make informed decisions.
- Communicate effectively through engagement with literature from a wide variety of sources pertaining to politics, philosophy and economics.

MODE OF DELIVERY - DISTANCE LEARNING

DISTANCE LEARNING AT STADIO

STADIO's distance learning programmes offer students excellent, quality education without the need to attend venue-based classes. The rapid technological advances of the past decade have transformed distance learning into an exciting study option for many students in South Africa, SADC, and internationally. However, STADIO recognises that many prospective students have only limited access to technology, with restricted connectivity, networks, and bandwidth. The STADIO distance-learning and teaching model therefore makes provision for this reality, ensuring that students can combine work and studies meaningfully, regardless of personal circumstances. Distance learning and teaching at STADIO is built on best practices, enabled and supported by technology. This includes a world-class learning management system where students can access their learning materials, assessments, and live online classes for each of the modules for which they have registered. In addition, in some qualifications, study materials will be provided in printed format. Key dates for milestones, such as assignment submissions and live online sessions, will be communicated well in advance to allow students to plan their studies. Online sessions are not compulsory; however, students are encouraged to participate in scheduled sessions as they are designed to promote student success. Online sessions are always recorded for convenience. Throughout the distance-learning journey, academic support is only a click away. Questions may be asked in the online module environment, where the lecturer will provide guidance. Distance-learning students have easy access to online library facilities and an eBook library, as well as access to a variety of online databases to support their studies. There is a physical library for distance-learning students on the Krugersdorp campus. STADIO understands the potential isolation of distance learning, and further provides a range of other support services to promote academic success and general student wellbeing. The full distance-learning experience is also accessible using your mobile device.

WHO SHOULD CONSIDER DISTANCE LEARNING?

Distance learning is suitable for students who wish to study from any location without the need to attend classes at a specific venue. Apart from the obligation to submit assessment tasks punctually, distance learning provides students with the flexibility to create their own study schedules. This option is particularly well suited for working adults, mature learners, or school-leavers who prefer learning at their own pace, reside at a distance from STADIO's campuses, or have other commitments during the day. Despite the physical distance, students still have access to expert lecturers, current study materials, and peer engagement through the online module learning environment. That said, it is important to highlight that some assessments, including the final examination, may require attendance at one of our exam venues, available throughout South Africa and internationally. This is STADIO's commitment to ensuring the integrity of its qualifications and the credibility of its graduates.

WHAT YOU CAN EXPECT FROM STADIO

Students will have access to a range of resources and facilities in person and online, designed to support not only their learning journey but also their social and emotional well-being. In most modules offered through distance learning in the schools of Administration and Management, Commerce, Law, and Policing and Law Enforcement, printed study materials are available in addition to the online study guides. STADIO offers academic support and wellness initiatives throughout the learning journey to help students realise their goals.

MODE OF DELIVERY - DISTANCE LEARNING CONTINUED

WHAT STADIO WILL EXPECT FROM YOU

In addition to engaging with the study materials (whether printed or online), students are required to utilise the online learning management system on their learning journey. Students, therefore, need access to a computer and to the internet to access and submit their assessments and to access feedback. STADIO believes that the key to academic success, especially in distance learning, is motivation and consistent engagement. Students will be expected to submit their assessment tasks on time and to take part in the learning activities designed to assist their learning journey. STADIO expects all students to always act in accordance with the principles of the Student Code of Conduct and the STADIO values and to be familiar with the institutional policies and rules, especially those pertaining to student success.

ADMISSION REQUIREMENTS

The admission criteria for the Bachelor of Arts are:

- a Senior Certificate (SC) with degree endorsement; or
- a National Senior Certificate (NSC) with a minimum of 50% in four 20-credit subjects and a minimum of 40% in English Home Language or First Additional Language; or
- a National Senior Certificate – Vocational Level 4 (NC(V)) with a minimum of 50% in three fundamental modules including English; and minimum 60% in four vocational modules; or
- a Higher Certificate (NQF 5), Advanced Certificate (NQF 6) or Diploma (NQF 6) in a cognate field.

NAMIBIAN STUDENTS (Alternative admission requirements)

25 points over 5 modules

ADDITIONAL OR SPECIFIC ADMISSION REQUIREMENTS

OTHER ACCESS PATHWAYS

STADIO is committed to achieving inclusion and to overcome barriers to access and success in higher education. Applicants who do not meet the stated admission criteria, but who have relevant work experience and/or prior learning may apply for admission under the policy on Recognition of Prior Learning (RPL). STADIO admits a maximum of 10% per cohort via RPL.

The implementation of RPL is context-specific, in terms of discipline, programme and level. Further information may be obtained from your Student Recruitment Advisor.

ARTICULATION OPTIONS

Students on this programme can articulate horizontally to similar programmes at other institutions in the Arts (eg Bachelors, Certificates, Diploma and Advanced Diploma programmes depending on the level or modules that the student has completed) with more extensive elective options or a more specific focus depending on the needs of the student. The following are examples:

Internally: STADIO: Bachelor of Arts in Law SAQA ID: 117948

Students on this programme can articulate vertically to postgraduate programmes at other institutions specialising in one of the majors offered/selected on the Bachelor. These can include the Bachelor Honours and Postgraduate Diploma.

STUDENT SUPPORT FOR DISTANCE LEARNING STUDENTS

Distance learning students have access to STADIO's student support services via the learning management system. Students can access a range of presentations and online support initiatives aimed at success and wellness. At the start of the semester, new students will be invited to join the online student orientation programme to familiarise themselves with the services offered by STADIO.

STADIO, in partnership with SADAG, has a dedicated STADIO student helpline providing students with free telephonic counselling, information, referrals, and support. Students will also have access to general counselling services.

MATURE AGE EXEMPTION

Candidates who do not meet the requirements for degree studies listed above, but who have reached the ages of 23 or 45 respectively, may apply for Mature Age Exemption via the USAF Matriculation Board under the following conditions:

- Candidates who have reached/will reach the age of 23 during the first year of registration and who have achieved a Senior Certificate with a pass in at least four subjects, including one of the official languages and including one subject on Higher Grade
- Candidates who have reached the age of 45 before or during the first year of registration.

CAREER OPPORTUNITIES

• POLITICAL ANALYST

• MEDIA AND JOURNALISM

• ACADEMIC RESEARCH / MARKETING RESEARCH

• GOVERNMENT - FOREIGN AFFAIRS

• DIPLOMATIC SERVICE

• POLICY & GOVERNANCE

SPECIFIC REQUIREMENTS

MINIMUM SYSTEM REQUIREMENTS:

- **Wi-Fi:** Reliable broadband Internet access (Wi-Fi is available on all of our campuses, but you may prefer access from home as well).
- **Web browser:** Chrome/Safari/Opera/FireFox.
- **Computer/Laptop:** A current Windows or Apple Mac computer/laptop capable of running the Office 365 software Office 365 includes Word, Excel, PowerPoint and Outlook.
- **PDF Viewer:** The free Adobe Acrobat software.
- **Scanning documents:** Ability to scan and upload documents (typically from your cellphone or smartphone).
- **Email/cellphone for notification and communication.**
- **Communication:** A cellphone or smartphone for receiving notifications and communication.

ACCESS TO TECHNOLOGY:

STADIO School of Arts & Humanities uses its ONLINE student administration and learning environments to provide students with materials and resources, to conduct online assessments, create discussion opportunities and render a range of administrative services.

Therefore, having continuous access to the above ONLINE facilities is essential for efficient communication, learning and success.

MODULE DESCRIPTIONS

ACADEMIC WRITING

The aim of this module is to introduce the student to the concept of appropriate academic and creative writing in a higher education setting, and equip them with the skills to apply it effectively within their specific subject areas. Students will acquire the foundational principles of academic reading and writing strategies along with strategic research methodologies and ethical research approaches. The communication and presentation of research will also play an important thematic role to assist students in developing confidence regarding the production and sharing of their own written research. Although the abovementioned focus resides on the academic world, the graduate (life-) skills of academic and creative writing form a golden thread throughout the module. Through individual and group exercises students will therefore have the opportunity to cultivate their own critical voice for their own specific context.

AFRICAN STUDIES

This module is aimed at establishing an awareness with students regarding the historical barriers on being African. Students will be exposed to colonialism and the rise of African consciousness in general and in the literature specifically. The nature of African culture and identity will be discussed. Contemporary African issues, like the migration will challenge, will be addressed. Lastly, current challenges in South Africa will be addressed.

COMMUNITY PROJECT

The purpose of this module is to expose students to the needs of the community through working with a charity. Engaging in community service provides students with the opportunity to become active members of their community and has a lasting, positive impact on society at large. Community service or volunteerism enables students to acquire life skills and knowledge, as well as provide a service to those who need it most.

END-USER COMPUTING

End user computing includes an online training component which allows student to practice simulated MS Office tasks at their own pace, supported by integrated feedback which helps them to identify and remedy their mistakes; and an assessment component which will count towards their overall module result. Students will also complete several assignments in which they will be expected to apply the MS Office tools that they have practiced in the online environment.

GLOBAL CITIZENSHIP

This module aims to expose students to the core values and associated principles contained in the United Nations Global Compact (UNGC). These principles which aim to promote responsible management practices and sustainable development are essential to the conduct of business nationally and internationally.

INNOVATION

Increased global competition, technological progress, rapidly changing market conditions and consumer demands, make innovation and differentiation essential for every organisation. The purpose of this module is to introduce students to innovation as an important source of competitive advantage and economic growth. Students will explore what innovation is, how it comes about, how it is managed in an organisation, how an innovation culture is established and how it contributes to a nation's progress.

LEADERSHIP AND ETHICS

This module covers transformational leadership, authentic leadership, team leadership, women and leadership, culture and leadership, and leadership ethics. The themes handled in the module will lay the foundations for future studies in leadership. Students will acquire the necessary knowledge and analytical skills needed to continue their studies in leadership and ethics. These skills in analysis, argumentation, and problem solving can also be implemented in other fields of study. Each theme also includes a practical exercise or thought experiment, which will enable the student to apply their knowledge and hone their analytical and critical thinking abilities.

PHILOSOPHY 1

The aim of this module is to introduce the student to the field of philosophy by giving them an overview of some of the main fields of study (or 'Big Questions') in philosophy. The module covers philosophical thinking, metaphysics, epistemology, ethics, logic and critical thinking, and the question of what it means to be human. A secondary aim of the module is to start the students on the path of questioning and critical thinking. The themes handled in the module will lay the foundations for future modules. Students will acquire the necessary knowledge and analytical skills needed to continue their studies in philosophy. These skills in analysis, argumentation, and problem solving can also be implemented in other fields of study. Each theme also includes a practical exercise or thought experiment, which will enable the student to apply their knowledge and hone their analytical and critical thinking abilities.

PHILOSOPHY 2A

The study of ethics and morality is primarily concerned with the question of how to live a good life, or how to be a good person. This question concerns every individual, in their private and professional capacities, as well as organizations, states, and communities. This module aims to introduce the student to the main forms of ethical theories and moral reasoning, requiring of them to not only question the basis of their own moral beliefs, but to be able to justify said beliefs and their actions in a coherent, logical, and ethical way. Students will not only gain knowledge of ethical theories, but also apply those theories to case studies, formulating arguments in support of their position on moral quandaries, and learn to identify the motives and reasoning behind ethical encounters they may encounter in their everyday lives. The aim of the module is not to expect students to accept a specific moral theory or doctrine, but to have them critically analyse the strengths and weaknesses, as well as the real-world implications of these strengths and weaknesses, of each theory.

MODULE DESCRIPTIONS CONTINUED

PHILOSOPHY 2B

The purpose of philosophical study is to acquire a holistic understanding of human life. To this end, we must study the story of humans and the history of our thought. This module will introduce students to ancient philosophers from across the globe, who each attempted to answer the Big Questions humankind is faced with in their own way. The aim of the module is to give students a deeper understanding of the development of philosophical thought and equip them with the skills necessary to critically analyse and compare different theories. By studying and comparing theories and thinkers from Europe, Asia, and Africa, students will come to a critical understanding of the sheer diversity of philosophical thought, but also the shared experiences and theoretical responses which unite philosophers across contexts. Practical exercises and thought experiments will make the abstract theories concrete and applicable to students' daily lives. The module is foundational, as understanding the ancients is critical in understanding all philosophy that follows.

PHILOSOPHY 3A

The past century has been one of political upheaval, with constant warfare, totalitarian regimes, countless revolutions, economic upheavals, and (on the positive side) the spread of human rights and freedoms. This module will give students an overview of the political movements of the past century, the ideologies which inspired those movements, and the critical responses to such ideologies. The relation between political theory and local and global political practice will become evident, with students grappling with issues such as racism, sexism, and the legacy of the twentieth century.

Relevant case studies, such as decolonizing at universities and climate change, will challenge students to not only understand the theories, but through independent and critical thought, question and justify their own perspectives, suggest solutions, and exercise responsible political judgement. The aim of the module is not only to give students an in-depth and critical understanding of political theory and practice, but to equip them with the sound political judgement an informed, responsible, and active citizen requires.

PHILOSOPHY 3B

The Applied Ethics module is the meeting place for ethical theory, acquired in previous modules, and the biggest ethical questions of our time: bioethics, environmental and animal ethics, business ethics, technological ethics, and the ethics of memory. Contemporary society is characterised by constant technological advancements, environmental dangers, and a growing realisation that individuals and organisations need to take responsibility for one another, other beings, and the planet. This raises exciting, albeit daunting, ethical questions, from the ethical treatment of robots to the question of human survival on earth and, critically relevant in South Africa, how to process collective trauma. Students will engage with these questions, applying their existing knowledge of moral principles and ethical reasoning, to attempt to find solutions to the most pressing questions of our time. The case studies accompanying each topic will challenge students to engage critically with theory and reality, activating their problem solving, analytical, imaginative, and innovative thinking skills.

PHILOSOPHY 3C

The module aims to introduce participants to broad political movements and theories which were influential in shaping contemporary society. From the early origins of democracy, to theories on the formation and nature of state systems, political movements in the twentieth century, and criticisms and alternatives to political states and institutions, this module provides students with a holistic and critical understanding of political philosophy. Themes relevant to the South African context – such as the nature of liberal democracies and communist movements – will be discussed, while students will also be expected to apply abstract ideas and relate political theories to political practice. Comparative and analytical exercises, designed to teach the student independent thinking and research skills, accompany each main topic. Where earlier modules focused on societies' answers to questions of reality and morality, students will learn in this module how societies organize politically around their answers to such questions. Understanding political theory is important not only for philosophers, but also for those studying political science, governance, and economics.

POLITICS AND GOVERNMENT 1

The aim of this module is to introduce students to the study of politics. It is based on three essential components that are identified as the introductory foundation in understanding politics. This will include defining the nature of the state in politics, the conceptualization of how power can and should be used, and examining the way power can be utilized to achieve particular ends. Secondly, the module will assess institutions through the manner in which political actions are conducted such as the separation of powers between the three spheres of government. The primary focus will be on democratic institutions as described within formal constitutional rules, but also in the context of institutions in states where democracy is not formally constituted. Lastly political processes and the role of political actors will be assessed in gauging the factors that influence state society relations, democratic consolidation, and the dynamics of electoral politics, constitutional values and rules. The African and the South African political landscape will serve as the contextual analytical framework.

POLITICS AND GOVERNMENT 2A

In this module students will be introduced to the sub-field of comparative politics which comprises of an application of the comparative methodology in the study of government politics. Students will be presented with insights comparing how societies and polities have addressed challenges in similar and divergent ways, and some of the approaches developed in understanding systems of government. The criteria for selection of cases varies according to the question that is being researched, whether it be political stability, democratic quality, democratic transition and consolidation or socio-economic development. Africa and South Africa will be examined in this comparative context, extrapolating how African systems of governments are informed by pathways to development, models of democratic frameworks, dynamics of historical and contemporary structural conditions that influence the nature and institutional architecture of the state, society and culture.

MODULE DESCRIPTIONS CONTINUED

POLITICS AND GOVERNMENT 2B

The international system constitutes a critical backdrop for the relationship between states and non-states actors embedded into a wider set engagement with international organization such as the United Nations, the African Union (AU), regional economic communities including the Southern African Development Community (SADC), or the European Union (EU). Therefore the aim of this module is to introduce students to what constitutes the politics among nations as well as understanding the core elements that inform how such relations are conceptualised in practice and the theoretical debates such as ideology, diplomacy, international law, political economy, globalisation and power that are used in the study of International Relations. Africa and South Africa will serve as the framework to gauge the interpretation, position and integration in global affairs.

POLITICS AND GOVERNMENT 3A

The systematic study of politics gains its distinctiveness as a field of study by virtue of it being an academic discipline. The rigour embedded in this disciplinary approach is found in the application of a particular method of research. Each method is in turn based on a particular set of epistemic truth claims, which require on particular methodology over another, and one set of truth claims over others. Contending theoretical paradigms also align themselves with corresponding supportive epistemologies and methodologies. The aim of this module is to present to the student the range of methods of political research, each with their respective epistemological truth claims.

Students will be required to identify a research topic based on a selection of issues discussed in year 1 and 2. The student will have to consider a topic from the range of modules completed on Political Behaviour, Global Political Economy, comparative politics, international relations and African politics, introduction to political and south African politics. Student are required to apply the research methodology in developing their research on the topic with a view of developing research finding and producing a research report

POLITICS AND GOVERNMENT 3B

This subfield entails the study of political values, beliefs and attitudes that people endorse, and that find coherent expression in democratic political culture. The dynamics of political behaviour concern the way that people transfer dispositions from one generation to the next. If they succeed, the result is continuity in political culture, and stable conventional democratic political participation. To the extent that this transfer is incomplete, or fails, discontinuity in political culture arises, with resultant protest politics, instability and even violence. These issues will be tested in the African and South African context based on what issues inform political behaviour, beliefs, change, and the dynamics of contested electoral politics in how democracy is conceptualised and interpreted in practice.

POLITICS AND GOVERNMENT 3C

The module introduces students to the study of global political economy. It explores the dynamics that inform the economic relations of cooperation and conflict between major state and non-state political actors in international economic architecture. Using the 19th and 20th centuries as the backdrop of a global system of interaction, the major subject matter of this subfield that will be assessed will include the spheres of production, trade, finance and the rules governing the international economic order. Understanding the evolution of this system, and its primary characteristic require a conceptual and theoretical framework of understanding such as mercantilism, market liberalism, economic dependency (core-periphery structuralism), and the evolution of globalisation. Considering some of the major contending theoretical frameworks, which inform the practical contours of the global political economy, will be significant in interpreting and understanding South Africa and Africa's relationship to the power dynamics that define international political economy and the processes of structural transformation and regional economic integration. It will also assess the rise of actors such as China and India and their corresponding effects on the global economic architecture and the implications this has for Africa and South Africa.

UNDERSTANDING AND MANAGING CREATIVITY

Creativity is defined as the production of novel, useful and surprising ideas. Creative ideation provides individuals with the capacity to deal with and adapt to opportunities, threats and changes in everyday life. It is not just a reaction to problems and challenges but considered a driver of cultural evolution through the development of new ideas and subsequent innovation. Within industry, creativity as a driver of innovation, is considered an important economic resource and viewed as an integral factor contributing to the overall success of a firm. Yet, despite the importance of creativity for driving innovation and evolution within increasingly unstable and turbulent economic and social environments the understanding and management of creativity remains too often a poorly understood area.

This module is designed to provide students with the opportunity to develop a critical awareness of current theories concerning the role of creativity in the economy and society as well as approaches to the management of creativity at individual, group and organisational level.

UNDERSTANDING HUMAN BEHAVIOUR

Human behaviour is a complex phenomenon and is implicit in most human interactions on a daily basis. The purpose of this module is to introduce students to a comprehensive framework for understanding human behaviour and relationships on an individual, team and organisational level. The module covers individual and social behavioural processes, personality in the work context, and employee and organizational well-being, which will equip the student to comprehend behavioural concepts and issues in the workplace.
